contents

- Does your practice have areas that could be improved?
- Would you like to change the current layout, or are you thinking of moving to a new location?
- Or does your reception area simply need a refreshing facelift?
- What about workflow within your sterilisation and lab? How do patients view your surgery?
- Have a look through the following pages and see how Prodent can help you in all areas of your practice.

reception / waiting

Your reception area is your showroom.

This is where you set the mood and atmosphere of your whole practice.

Our dedicated team of Interior Designers can work with you to transform any aspect of your reception into a true showpiece. We can also enhance your existing design to create a warm and friendly environment.

YOUR RECEPTION AREA IS YOUR SHOW ROOM

surgery

This is the focal point of every practice. Our vast experience with input from Dentists over the years has resulted in our slogan 'Designed by Dentists for Dentists'. This means that no matter what field of Dentistry you specialise in, we can design the most harmonious and efficient surgery possible. Our designs are tailored to your particular circumstances, and incorporate your ideas and needs into our concepts.

THE SURGERY
IS THE
FOCAL POINT
OF EVERY
PRACTICE

surgery cont.

Warm subtle hues or bright vibrant colours can help with patient comfort and rapport, from elderly to paediatric. Flooring, cabinetry finishes and feature walls are all ways to utilise colour. A little accent or task lighting can add a whole new dimension to your room. Have you thought of glass graphics and chair upholstery colours, or built-in glove, tissue, cup and paper-towel dispensers?

WARM SUBTLE HUES OR BRIGHT VIBRANT COLOURS CAN HELP WITH PATIENT COMFORT AND RAPPORT, FROM ELDERLY TO PAEDIATRIC

sterilisation

Workflow, function, hygiene, ergonomics, storage... these are all critical aspects of your sterilisation area. Consider task lighting to emphasise clean and dirty areas. Could you use a pass-through tray unit or soft-close plaster drawers in your lab? We can incorporate sound proof cupboards for your compressor and suction motor and touch latches to your doors. Ask about our benchtop materials and splashback options.

WORKFLOW, FUNCTION, HYGIENE, ERGONOMICS, STORAGE... THESE ARE ALL CRITICAL ASPECTS OF YOUR STERILISATION AREA

staff

This is where your staff can relax, catch up on the news, or simply grab a coffee. Your staff area can be a real 'home away from home' offering comfort and kitchen facilities away from the busy work environment. Our professional approach to space planning will optimise the usefulness and enjoyment of this area.

THIS IS WHERE YOUR STAFF CAN RELAX, CATCH UP ON THE NEWS, OR SIMPLY GRAB A COFFEE

patient refresh

This feature in a practice is becoming more and more popular, especially appreciated by the busy patient hurrying back to work from an appointment. Your patient refresh area can be as simple as a mirror and basin or transformed into an inspiring centrepiece with a backlit mirror, granite benchtop and designer basin and tapware. A tissue slot and drop through waste-chute are always thoughtful inclusions.

THIS FEATURE IN A PRACTICE IS BECOMING MORE AND MORE POPULAR, ESPECIALLY APPRECIATED BY THE BUSY PATIENT HURRYING BACK TO WORK FROM AN APPOINTMENT

office

The humble office is the pulse of your practice. Would you like a little more storage, a cloak cupboard, or even a pull-out CPU holder? Does your current storage system need improvement? We can offer a new filing area and under desk pull-outs for your print and fax. Ask us about our pinboard fabrics and door hardware.

gallery

It's no secret that choice of finishes accounts for about 10% of your renovations costs, but these have about 80% of the visual impact. Here is a small gallery of ideas that have evolved through our design experience that can boost this impact and create a truly stunning effect in your practice. Have you ever thought of remodeling your patient WC area, or installing a built-in product display unit? Ask us about magazine display, banquettes and client seating, display pockets for ornaments, bulkhead and lighting features over your reception. The rest is up to you...
